

PURE COPPER

POLYESTER TAFFETA FABRIC *(Compare to Flectron®)*

Shiny, smooth fabric with pure copper. Light weight and flexible. Easy to cut and sew like ordinary fabric. Better color stability due to tarnish resistant finish. High conductivity and shielding performance. Use it for drapes, wall covering, garments, pouches and more.

Great price too!

Width: 1080 mm (42.5")

Thickness: 0.08mm (3 mil)

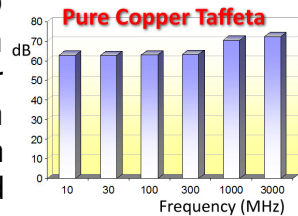

Weight: 80 g/m²

(~ 35% Cu)

Surface Resistivity: 0.05 Ohm/sq

Temp range: -40 °C to 150 °C, up to 200 °C short term

The fabric is highly conductive. DO NOT allow the fabric to come in contact with electric wires, outlets or switches. Cover nearby outlets with child safety caps. Does not contain flame retardant, use caution around open flames and heat sources.

Washing Instructions: Do not machine wash or dry clean. Dry brush or wipe only. Do not iron.
