

COPPER WIRE MESH

When Only Pure Copper Will Do

Highly transparent and conductive. Woven pure copper, fine wire mesh is useful for RF and electric field shielding, Faraday cages and grounding. Mesh is flexible and cuts easily with scissors. Will conform to most shapes or lay flat easily. Can be soldered. Easy to connect a ground cord.

Also very decorative, but susceptible to tarnish. It will turn brown, then green, when exposed to the environment, so definitely not for exterior use.

16 wires per inch
0.011" Wire Diameter
0.051 inch openings
67% open
2.3 oz/ft²
Width: 36 inches

Washing Instructions: Do not machine wash or dry clean. Dry brush, wipe, or rinse in plain water. Hang dry immediately. Do not iron.
