

SLEEP SHIELDING

FARADAY CANOPY

Give your body a chance to rest! Attractive and functional canopy can be used over beds or other similar sized areas to reduce radiofrequency radiation. Made from very light weight Swiss Shield Daylight fabric (92% polyester net-knit, with 8% Silver-plated Copper fiber content) which stops 97% (16dB) of microwave radiation energy penetration (at least 200-3000 MHz).

Nice veil-like appearance (plenty of air and light penetration), and has the conductive components on the inside of the threads, so no metal coating to flake and *no need for grounding!* Canopy covers the top and sides of bed. Easy to get in/out of bed and lots of head room. Simply get additional Daylite fabric if you want to shield *underneath* the bed. Can be washed in gentle cycle with mild detergent. Even frequent washing seems to do no harm to the shielding power of the fabric. Comes with a swag hook and an easily detachable hoop for easy mounting. Very transportable.

Some owners say using this product to reduce RF has reduced their symptoms associated with electrosensitivity, such as ringing in the ears, headaches/migraines, insomnia, confusion, irritability, nausea, circulation problems, etc. 2 sizes:

Faraday Canopy King/Queen/Full Size (Cat. #Q200-K) \$1099.00
Faraday Canopy Single/Twin/Crib Size (Cat. #Q200-T) \$759.00

DREAM CANOPY

Portable Faraday Microwave Safety Net

This may be the best value in microwave shielding. Extremely sheer and transparent, it offers excellent air circulation and dramatic shielding performance of 30-45dB. Shields cell phone, wi-fi and other wireless signals nicely. Also shields electric field. Easy access slit on one side makes getting in and out a snap.

Perfect for travelling as it takes up less room than a sweater in your suitcase and weighs only about a pound. Light gray color. Does double duty as a mosquito net, too! Not just for beds either! Can be used over a couch, workstation, your favorite lounge or hammock. Includes ground cord, stainless steel ceiling hook and support ring. Fabric is delicate, 100% pure Silver coated Nylon, so do not wash. Two sizes to choose from: Twin/single is 7.5 feet high with 26 foot perimeter at the base. Full/King is 8.2 feet high with a 39 foot perimeter at the base. Both are tapered toward the top. **Twin/Single/Crib (Cat. #Q342) \$599**
Full/Queen/King (Cat. #Q343) \$899

NATURELL™ BED CANOPY

All Cotton, More Headroom

This box shaped canopy offers good shielding from wireless radiation such as cell phone towers, wifi, and cordless phones. Side slits provide easy in/out access and multiple ceiling attachments help create excellent inside volume and a sense of airy-ness. Naturell™ fabric incorporates super thin silver threads which reflect RF radiation, and could help you get the refreshing sleep you need. Easy to install, washable, and no need for grounding. Great for home use or travel.

Will fit over most bed frames:

Twin dimensions: Width 125 cm, depth 225 cm, height 200 cm.

King dimensions: Width 225 cm, depth 225 cm, height 200 cm.

Made from natural cotton which is OEKO-TEX certified, meaning it was tested to be free from any harmful substances. There are many ways to mount the canopy. Swag hooks (included) can be placed into ceiling. King size requires 8 ceiling hooks. Twin sizes needs 6 ceiling hooks. Also, you can make a wooden or PVC support frame, or even use clothesline or the existing frame of a 4 poster bed. Add a floor mat (sold separately) if you also want protection from below. **Naturell Bed Canopy:**

Twin (Cat. #Q370-T) ... \$1500.00 Queen/King (Cat. #Q370-K) ... \$1600.00
