

SLEEP SHIELDING

BoDefense™ Shelter *Spacious Serenity*

BoDefense (pronounced "body fence") is a shielding option that is halfway between shielding the whole room architecturally and wearing shielded clothing. Maximum headroom and good radiofrequency shielding is achieved using washable SwissShield Daylight fabric plus a light-weight customizable all steel frame. It has superb air flow and light penetration. Shielding performance is just like the Light Duty Canopy but this arrangement requires no ceiling hooks and is completely self supporting. Includes shielding for the "roof" plus all 4 sides. Two flap entrances allow easy access from either side. An optional floor shield is available as an accessory if you also have radiation coming from below.

Of course, this shield can be used over a bed, but it can also be used over a work station, couch, or dining room table. Choose the size that fits your needs:

- Large: 6 feet high, 7 feet 11 inches wide. (fits a king size bed)
- Small: 6 feet high, 7 feet 11 inches x 4 feet. (fits a twin bed)

Easy enough to put up so it's great for home or travel. Includes everything you need: shielding fabric, steel frame, and fabric clips. If you use the floor shielding, you will need to purchase a floor covering (e.g. carpet or linoleum) to protect it from wear and tear. Check that you have enough height available under any light fixtures, ceiling fans, or chandeliers. For indoor use only.

BoDefense™ Shelter, Large (Cat. #R940) \$1499.95
Large Floor Shield (Cat. #R940-F) \$229.95

BoDefense™ Shelter, Small (Cat. #R941) ... \$1099.95
Small Floor Shield (Cat. #R941-F) \$139.95

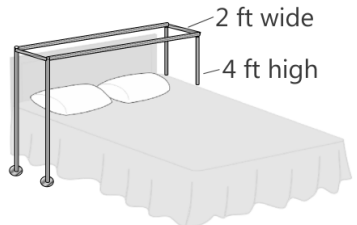

BoDefense™ Mini *Shields the Head in Bed*

Sometimes RF shielding for just the head and upper body while sleeping is enough. This downsized version of the BoDefense Shelter does just that, and costs quite a bit less! It is free standing and requires no hooks in the walls or ceiling. A sturdy metal frame, which assembles quickly for easy travel, supports the shielding fabric and gives plenty of headroom and air space. Can be used with or without a headboard. Add a **floor mat** between the mattress and box spring if you need protection from below, or add **shielded flat and fitted sheets** if you need protection from below *plus*

protection for the legs and feet. Available in three sizes. 48 inches high and wide enough to straddle the mattress and standard frame.

Washable, plus good shielding (~20dB), air flow and light with lower cost.

	Cat. #	Price
Twin	R942-D	\$359.95
Full/Queen	R 943-D	\$399.95
King	R 944-D	\$439.95
