

SHIELDING PLASTIC FILMS

BUDGET RF FILM *Economy RF Shielding*

On a tight budget or have a temporary shielding situation? This lightweight conductive plastic film is a good choice. Great for windows and walls. Easy to hang with tape or tacks, and easy to trim with scissors. Can be grounded, surface resistivity is 10^9 Ohm/sq. Shielding performance is adequate at 90%. Also has anti-static properties. Very low cost per square foot. May be vacuum/heat sealed. Slightly mirrored finish provides dimming effect (some light penetration). No adhesive on this material. Made in USA. Generous 36 inch x 90 feet, 2.9 mil thick. Whole rolls only. **(Cat. #R227) \$89.00**

CONDUCTIVE TUBING *Low Cost E-Field Shielding*

Composed of electrically conductive black polyethylene (similar to Velostat) and great for shielding electrical cords. It's easy to slide any electrical cord (even fits those giant dryer plugs!) through this 4" wide (when flat) sleeve without having to remove the plug from the end of the cord. Only 4 mil thick, it won't hold up to tearing, heat or abuse, but it will do a great job on the lamp cord by your bed, the air conditioner cord, or even cables in your car. Electric field shielding. Surface resistivity $<10^4$ Ω /sq.

Conductive Tubing (Cat. #R1211) \$1.15 per lin ft
Full roll (750 ft) (Cat. #R1211-roll) \$229.00 per roll

BUDGET RF CURTAIN SHIELD

This has to be the shielding bargain of the century. A light weight, highly reflective mirrored plastic curtain which is simple to install and provides well over 20 dB (10:1) reduction in common radiofrequency and microwave radiation! Hangs easily from small diameter curtain rods and can be used to shield windows, make room partitions, doorway openings, or even as a wall hanging. Also blocks UV and sunlight, so it prevents sunlight fading of your furniture, and helps prevent heat loss. Built-in sleeve for curtain rod at the top. One side is conductive, make sure to use a ground cord. **30** inch wide x **63** inch long, and you can trim it easily with scissors to fit. Could also be used to make a poncho. Nearly opaque silver color. Both sides are conductive, so it can be grounded. **Budget RF Curtain Shield (Cat. #R226) \$5.95**

DISPOSABLE PONCHO WITH HOOD

Is this you? Your skin is burning, your heart is racing, or you are feeling irritable and spacey as pulses of microwave/RF radiation wash over you. It could be in your own apartment, on a plane or subway car, hotel or class room, workplace or movie theater. Even just walking down the street!

Whether you get caught in a surprise rain storm or irritating sea of wireless radiation, you'll be glad you packed your shielding hooded poncho. Covers head, torso and arms with ~ 20 dB shielding. Generously proportioned for ease of motion, one size fits most all body types. Easy to slip on and off, and extremely light weight. Keeps you warm, shaded from the sun, and dry too. Windproof. We call it disposable, but you can certainly re-use it. Weighs only 3 ounces, and 4x5 inches and when folded. Stores safely for years, ready when you need it. Perfect for purse, car, suitcase, camping or home use. One side is conductive. One side is conductive (the less slippery side) so it can be grounded.

Disposable Shielding Poncho w/ Hood (Cat. #R312) \$4.95
Poncho Bulk Pack 10 for the price of 9 (Cat. #R312-10) \$44.55
