

# COMBINATION METERS

## THE NATURAL EM METER

The NATURAL EM METER detects radio/microwaves and changes in extremely weak static (DC or "Natural") electric and magnetic fields. Using both a needle type meter and audible tone, it detects: radio transmitters, geo-magnetic storms, unusual magnetic solar activity, electrical activity of thunderstorms, leaky microwave ovens, magnetized rocks or bed frames, analog cellular phone EMF output, and concealed surveillance bugs.

Because it can sometimes detect the electrical presence of a person, this versatile meter can even be used in paranormal studies. Sensitive to changes in electric fields of as little as 3 V/m with a full scale deflection at 1000 V/m. Will measure magnetic field changes as small as 0.5% of the Earth's magnetic field (2.5 mG) and as high as 100  $\mu\text{T}$  (=1000 mG). RF sensitive down to 0.01 mW/cm<sup>2</sup>, with a full needle deflection at 1 mW/cm<sup>2</sup> over the frequency range of 100 kHz to 2.5 GHz. 9v battery included. 1 year mfr. warranty.

Has Sound

**(Cat. #Q151) ..... \$199.95**

## PERSONAL EMF ALARM

*Attention pacemaker wearers! Attention paranormal researchers!*

What could be better than a meter which alerts you with an audible alarm when it encounters a field? How about a meter which allows you to set the sensitivity of the alarm? How about a 3 axis meter? How about a meter which does all this for AC magnetic fields, AC electric fields, and RF radiation?! This meter does all that, for under \$200!!

Perfect for anyone who wants to monitor their EMF environment without having to stare at their meter hour after hour. Carry it with you to alert you when you become exposed to more radiation than you want. Set it in a strategic location to alert you when a field trips the alarm. You set the level (threshold) above which the alarm will sound. Can also be used as a nice analog meter to read field strength. Same specs as Trifield Flat Meter on page 72.

**(Cat. #Q154) ..... \$189.95**

## PACE-ALERT™

*Peace of Mind for Pacemaker Wearers*

Pacemakers and implantable defibrillators are vulnerable to strong electro-magnetic fields. Manufacturers of these devices have set EMF limits, but how is the user to know if his work or home environment is safe?

PaceAlert is made specifically with pacemaker safety in mind. Simply turn the unit on and it will warn with LED lights and audible alarm if it encounters EMF near the limits for proper and safe operation of implanted devices. PaceAlert monitors AC magnetic fields, AC electric fields, and radiofrequencies simultaneously.

Has Sound

Common sources of strong fields include microwave ovens, power tools, hair dryers, vacuum cleaners, electric ranges and toaster ovens, electric circuit boxes, welding equipment, etc.

Alarm thresholds:

- ❖ 4 kV/m for electric field at 50/60 Hz
- ❖ 1.5 Gauss magnetic field at 50/60 Hz
- ❖ 100 V/m RF from 500 kHz – 6 GHz

No adjustments needed, no complicated interpretations to make. If you hear the alarm, you are too close! LEDs will indicate type of EMF (electric, magnetic, or RF). Convenient size fits in pocket or purse. Or it can be worn as a necklace or on belt clip. Gets about 20 hours on standard 9V alkaline battery, 9 hours with rechargeable. Low battery indicator. 1 year warranty. Annual re-calibration available. **(Cat. #Q475) ... \$199.95**

### Pace-Alert Mini

*Need a Smaller Format?*

This mini version weighs only 0.7 ounces and is about the size of a pack of gum. Easy to keep in a purse or hang on a keychain. Monitors AC magnetic field (3 axis) and RF. Perfect when you are on the go.

**Pace-Alert Mini (Cat#906) ... \$125**
