

PHONE SHIELDS

POCKET STICKER

Reflects up to 99% of Microwave Radiation Away from Body

So you are careful about NOT putting your radiation emitting mobile near your head. That's good. But think about this: what body parts get the radiation when you put the thing on your pocket, bra, hat, purse, holster or elsewhere on your body? Now your vital and sometimes private organs are basically in contact with the source of the microwaves, getting the largest dose possible. Pocket Sticker is a high performance shielding patch that you stick onto your clothing which reflects that radiation away from your body.

Simply invert the pocket, trim that patch to size if needed, peel and stick into place. Nothing to remember and nothing to lose. Just make sure the patch is positioned between you and the phone. Laboratory tested, the Pocket Sticker deflects up to 99% of cell phone radiation away from the body. Can be used in jacket, shirt or pants pockets, holsters, bras, purses and other places where you keep your phone.

- Pocket Sticker fabric: 90% cotton, 9.5% copper and 0.5% silver
- Dimensions: 16cm x 10cm (6.25" x 3.9")
- Advanced, high quality fabric and adhesive
- Friendly on the skin, washable, durable and comfortable
- Care Instructions: Machine wash, cold water. No bleach. Do not dry clean.

Each package contains 3 patches. Get enough for your wardrobe. Makes a great gift too!

Pocket Sticker (Cat. #Q333) \$19.95

EVIDENCE BAG

Security Grade RF Shielded Pouch

When it absolutely, positively has to be shielded! Evidence Bag is a double-layer, silver fabric, shielded pouch made to industrial specifications for forensic quality shielding. Field tests have shown 99.99% RF signal attenuation.

Prevents most phones from receiving or making calls and protects the contents from RF radiation.

Double fold-over and Velcro-sealed opening is completely reusable and perfect for storing:

Pagers Key fobs	EZYPass GPS	Cell phones RFID tags	Passports Credit cards	ID badges Homeopathic remedies
--------------------	----------------	--------------------------	---------------------------	-----------------------------------

Great for travelling, shopping, or storage. Maintains shielding performance for hundreds of captures. Accommodate flat objects up to 6.5 x 4 inches or smaller thick ones. Includes clear external pocket to hold a label or tag. **Evidence Bag (Cat. #Q470) \$44.95**

CUP HOLDER MOUNT FOR PHONES & GPS

Keeps Radiation Away From Your Body While Driving

So you decided you are going to use your cell phone in your car, despite all the warnings. But you have the good sense to keep it away from your head and body! This handy mount can securely hold your phone, iPod, MP3 player or GPS unit with confidence as your drive. Allows easy access and a clear view. Can be used by anyone in the car: driver, passenger, or even in the back seat. Plugs securely into a cup holder and is fully adjustable to any position. Cradle adjusts and can securely accommodate devices up 3.5 inches wide.

Completely usage free. Can also be used on boats, recliners or anywhere a cup holder is waiting. You can even do his'n'hers! **(Cat. #Q728) \$34.95**
