

MORE UNIQUE METERS

AIR ION COUNTER

Unique in this Price Range

This hand-held ion counter possesses the same sensitivity (down to 10 ions/cm³) as meters costing far more. Fully electrostatically shielded, with a fan throughput of 200 cm³/sec, it can make accurate readings even in adverse conditions. Measures positive and negative ions separately. Use it to measure the ions generated

from electrical storms, water spray, radioactive minerals & radon, corona discharge from high tension wires, even check the effectiveness of your ion generator! Made in USA with a 1 year warranty. 9 volt battery included.

Setting Time: 10 sec
 Noise level: 10 ions/cm³
 Accuracy: ±25% for fast ions
 Ion selectivity (crosstalk): 20x
 Range: 10 - 1,999,000 ions/cm³

Air Ion Counter 2M (Cat. #Q156) \$499.95

Extended range version available with range of 100 - 19,990,000 ions/cm³ for high ion concentration measurements. Same price, same great features.

Air Ion Counter 20M (Cat. #Q156-20M) \$499.95

STRIKEALERT™ *Personal Lightning Detector*

StrikeAlert is a small and affordable lightning de-tector that provides an early warning of approaching lightning strikes from as far away as 40 miles, and lets you know if the storm is coming your way or moving away. An audible alarm allows you to determine the storm's activity without having to visually monitor the unit and sounds when there's a strike. A corresponding LED light illuminates to indicate lightning at distances of 20-40 miles, 12-24 miles, 6-12 miles and within 6 miles. Housed in a small pager-like casing that can be clipped on a belt and runs up to 100 hours on a single AA battery. Perfect for kite flyers, golfers, sailors, pilots, athletes, beach goers and anyone who spends work or leisure time outdoors. Paranormal investigators can also use the

Has Sound

StrikeAlert to monitor for unusual lightning-like activity. Made in USA.

(Cat. #Q401) \$79.95

ELECTROSTATIC LOCATOR

Measures static charges (DC Electric Field) instantly, reliably and economically in a pocket size meter!

- Measures static charges from zero to 30,000 volts, Accuracy ±10%
- Minimum sensitivity is 50V at 1/2"
- Designed for close and repetitive readings
- Uses standard 9 volt battery with battery test feature
- Low drift, Repeatability + 1%
- Unique Quick Zero function which instantly re-zeros the instrument and provides ground compensation for the user

Weight: 5.5 ounces

Size: 4-3/8" X 2-5/8" X 1-5/16"

1 year warranty. Made in USA.

Electrostatic Locator (Cat. #Q188) \$410.00
