

BODY VOLTAGE MEASUREMENT

BODY VOLTAGE METER

Measure the Voltage Effects of EMF on Your Body!

An external field will induce an electric field within our bodies. In this sense, our bodies act as antennas picking up fields from electric blankets, alarm clocks, powerlines, and just about everything connected to a source of electric power.

Delicate biological cellular processes (like brain function and heart muscle contraction) operate on the scale of microVolts to millivolts. Body Voltage can exceed several Volts in some cases.

The Body Voltage Meter quickly and easily reports this induced body voltage. Simply hold the sensor handle. Notice how your body voltage varies as you move about the room, as you change position (standing vs. lying down, for example) and it also depends on what you are wearing.

The Body Voltage Meter is a great way to test the effectiveness of your static discharge devices and can be used to measure the AC voltage build up on static producing surfaces. Large digital readout is easy to see and sensitive down to 1 mV. Will help you detect irritating voltage sources which may not otherwise be obvious. Comes complete. Uses 1 9V battery (not included). Calibrated for 40-500 Hz.

Body Voltage Meter (Cat. #Q183) \$89.95

Body Voltage Meter, now available with Ground Stake

Use True Earth as Your Reference

If you prefer to ground to soil, this version of our popular Body Voltage meter comes with a 4 foot copper-plated steel rod and 50 feet of cord so you can ground directly to Earth for confident readings. This is especially important when:

- 1- You don't have a convenient electrical ground to work with
- 2- You are working outdoors
- 3- You have voltage or dirty electricity on your ground lines
- 4- You don't trust the ground in your building

Simply push the ground rod into the soil and run the ground cord to the location where you want to perform your body voltage measurements.

Body Voltage Meter with Ground Stake (Cat. #Q183-stake).....\$129.90

Need more cable?

This handy 50 ft extension cable has banana male on one end, female on the other. You can daisy chain as many as you like to achieve the desired length.

50' Banana Extension (Cat. #Q291-ext).....\$19.95
