

# LOW EMF DEVICES

## RF Kill Box™

*Shielding So Good That Your Phone Won't Ring*

Most cellphone shielding products are designed to reduce radiation to the user while still allowing the phone to function. This means that some radiation can still get to the phone... *and some radiation can still get out of the phone!* But sometimes you need to completely kill the signal. The RF Kill Box is a full-metal shielding jacket with very high shielding performance.

You probably know that different phones have differing signal quality... depending on your carrier, your location, and your phone model. A strong signal is harder to kill. In our tests, 99% of the phones we tested would not function when in the Kill Box under any circumstances.

The metal slip on cover is quick and easy to use and provides a good seal. Inside diameter is 95mm (3 3/4") and the height is 170 mm (6 5/8"). Large enough to hold most phones, but check your dimensions. **RF Kill Box (Cat. #Q316) ..... \$18.65**

## EMP CAN™

*Versatile Shield for Both RF and Magnetic Fields*

Homeopathic remedies, credit cards and passports with chips, and electronic equipment can all be compromised by exposure to electromagnetic fields. The EMP Can™ is a great air-tight way to store these items and protect them from outside EMF influences including low grade EMP. Shields both radiofrequency *and* magnetic fields by 95% or more. All metal construction, nice wide mouth and quick-close latch keep contents secure.

In addition, you can put a radiation source (such as a mobile phone or magnet) *inside* the EMP Can to contain the field. 3.6" wide x 6.5" high. **EMP Can™ (Cat. #Q339) ..... \$14.95**

## SHIELDED NETWORK CABLE

*Cat7 Shielded Ethernet (Stranded Copper) Patch Cord with Molded Snagless Plug*

Cat 7 cable is like Cat 5 and Cat 6, only faster. And this Cat 7 cable is shielded, both to keep interference out of the cable, and to block electric field and RF emissions *from the cable*. Simply plug it in for worry-free internet connection between your computer and the modem/router. Cable connection is both faster than wireless and more secure. Now, just turn off the wireless at the modem and at the computer for a radiation free internet connection! 26AWG, 600MHZ SSTP(PIMF) Select your desired length.

### Shielded Network Cable:

- 10 foot (black) (Cat. #Q703-10) ..... \$10.00
- 25 foot (blue) (Cat. #Q703-25) ..... \$20.00
- 50 foot (gray) (Cat. #Q703-50) ..... \$35.00
- 100 foot (white) (Cat. #Q703-100) ..... \$50.00
